Sheridan's New JTX Marker Top Of It's Class

East Bloomfield, New York - Sheridan Paintball proudly introduces the new Sheridan JTX semi-automatic paintball marker. This innovative new marker is an in-line, blowback semi-automatic that offers performance, durability and value, with all of the features today's Players and Gamefield Operators are looking for. The new Sheridan JTX offers more useful features than anything in it's category, all at a groundbreaking value. One of the most valuable benefits is the unique pivoting hinge action that allows for super quick cleaning with no tools. The gun can be completely field stripped all the way to the valve in about 32 seconds! The new Sheridan JTX accepts most after-market Spyder barrels, including Smart Parts, Dye Products, J&J, Lapco, Armson, ACI Zero Gravity, 32 Degrees, and others. Utilizing a low operating pressure range of 400-450 psi allows for outstanding performance, delivering 100 shots per ounce of CO2, unmatched by any other marker in its class. An external velocity adjustment, built in sight rail, replaceable trigger shoe and a true 45-style grip frame round out the impressive list of features. The JTX features a sleek, new in-line design, lightweight construction and rear "bottom-line" bottle attachment for optimum balance and shooting comfort. The power feed is adjustable, and the ball detent feed system maximizes effectiveness with a broad range of Paintball brands. Sheridan has also introduced a new JTX expansion chamber kit, and the marker accepts a variety of custom after-market upgrades. The new Sheridan is sold individually or as part of a complete JTX Tournament Kit. "Paintball is experiencing an incredible surge of new Gamefield Business Operators and aggressive young players. Our goal is to provide these Businesses and new enthusiasts with the best equipment they can buy, and that's why we're offering this rugged technology at such an incredible price", states Chip Klass, Sheridan's Director of Marketing.

"Sheridan built their tough reputation of durability by providing the World's first virtually indestructible Paintball guns; from the PGP and P68 pump guns, to the 1st ever mass produced Semi-Auto VM68. Today, the new Sheridan JTX takes Paintball to the next level." Today's Paintball Business Operators must cater to a demanding new Player; they want top performance, easy operation, and an intimidating appearance, all in an affordable price range. The JTX delivers on all counts.

Sheridan Paintball is a division of Crosman Corporation, with its headquarters in East Bloomfield, New York. Additional information is available at the company's web site: www.sheridanusa.com. GameField Operators and Retailers: For Wholesale Direct Orders and pricing, call:
